JOIN THE LEXICON AMBASSADOR PROGRAM AND EARN REQUIRED VOLUNTEER HOURS TO FULFILL GRADUATION REQUIREMENTS THROUGH ONE OF OUR ONLINE PROJECTS WHILE MAKING A REAL DIFFERENCE IN THE WORLD.

## YOUR TICKET TO GLOBAL CITIZENSHIP

The Lexicon Ambassadors Program offers an experiential learning journey that empowers students to create sustainable solutions to address critical global issues, making the world a better place

**W**elcome to the Lexicon Ambassador Program! This unique program offers the opportunity to participate online in international projects based on the United Nations Sustainable Development Goals. Our program offers engagement with mentors who are leaders in their area of expertise. Participants will receive unprecedented support in the form of assistance with college and scholarship applications and academic support in the form of live instructor-based SAT zoom lectures. Upon completion, participants receive a certificate and a personal letter of evaluation which can be used for college and scholarship applications.

### **Our Program**

Our program is an online experiential learning program designed to help high school students develop critical skills necessary to become effective leaders both in and outside the classroom. Our blended program offers intensive online leadership training and participation in virtual international volunteer programs to gain practical experience while making an impact in the world. We believe in holistic training and our program is designed to support the student's personal and academic development while making a real change in the world.

Our comprehensive program package includes the following:

- **Leadership Training for Global Citizenship aligned with the UN Sustainable Development Goals (Required)**

The world is changing fast, and past experiences have demonstrated that youth education needs to adapt. School plays an important role in nurturing academic education, but students still need leadership development training to prepare for the challenges they will face in the world. Our global citizenship leadership program is led by an international expert who leads an initiative that is one of the U.N. Sustainable Development Goals recognized programs. Students will learn how they can effect change in global affairs, contribute to sustainable development goals and lead in and outside of school. The leadership track is taught by a mentor who is a recipient of the United Nations Sustainable Development Goals Action Award 2018.

- **Virtual International Volunteer Tracks (Select One)**

College admission committees review applications holistically and often, students may still get rejected or waitlisted even with high GPAs and SAT scores because their application is lacking.

another key component - the over and above. This is where the Lexicon Ambassadors Program comes in, we offer students the opportunity to participate in virtual international volunteer programs while making an impact without the need to travel. Students will work directly with international mentors based in the country in which each project is being implemented, tackling real-world problems with the goal of making a meaningful difference in the world. All ambassadors are required to enroll in the leadership training and participate in one of the volunteer tracks to complete the program.

### **South Africa Literacy Project (online)**

Students learn to map curriculum, align classroom activities to South Africa national standards while creating "low tech" activities and deliverables which are open source and available to teachers in developing countries. The goal of this program is to create a complete literacy curriculum that maps back to the standards and is freely available.

### **South Asia Cancer Surveillance Project (online)**

Students work with a U.S. based hematologist and oncologist to improve the detection of cancer and reduce disease progression in underserved areas. Program includes regular live zoom discussions covering relevant public health issues in cancer surveillance. The goal of this program is to develop public health initiatives that are appropriate for the regions in which issues are identified. This program is designed for students who aspire to the medical or public health professional fields.

### **Local Activist Track (online)**

Students wishing to work within their own community on original projects have the opportunity to work leadership mentors to develop and execute their ideas.

### **Citizen Journalist Project (online)**

Students work with a team led by published authors, journalist, editors, and international writers to compose and publish stories based on local knowledge online. The goal of this project is to increase cultural awareness, give voice to those who do not have one, while improving the mentee's writing ability.

## **Academic Enrichment**

### **• Live SAT Tutoring via Zoom**

The SAT is an undoubtedly critical component of the college application package, and we offer complementary live instructor facilitated SAT zoom lectures for all leadership mentees to help them achieve their academic goals. Students will have the opportunity to engage with the tutors to address their specific SAT needs. Additionally, students enrolled in our program will also have unlimited access to a wide range of SAT prep materials including SAT practice questions and flash cards. We are the only program to offer this level of academic support to the leadership students.

- **Academic Support for College and Scholarship Applications**

Admission to college is very competitive and all leadership participants will benefit from our academic advising service, inclusive in the program. Our team of expert academic advisors have been through all the hoops and will provide personalized college and scholarship application reviews. The application essay or personal statement is the opportunity for students to highlight what may not be clear in their academic records. Our academic advisors will help them polish their essays so that it truly represents who they are, their passions, and capabilities, allowing them stand out to the admission committee.

We offer rolling admissions with start dates biweekly throughout the calendar. We are offering limited partial and full scholarship to cover tuition costs (exclusive of the registration fees) on a first come, first serve basis, so early application is encouraged.
